## Here is the Answer

to that oft asked question:

"What will Howard E. Coffin do when he builds a 'SIX'?"

The "54" HUDSON answers the question everyone in motordom has been asking for years. All know Howard E. Coffin to be America's foremost engineer. His six famous four-cylinder cars gained a reputation for him which led all to expect a wonderful six from him.

But sixes are not like fours, as many a designer has learned to his sorrow. Mr. Coffin realized that and so instead of attempting a six alone, he first secured as his associates the men who had already accomplished the most in six-cylinder designing. His men came from the leading factories of Europe and America. There are 48 in all—representing 97 leading motor car manufacturers. Combined they know just about all that has been learned in motor car

ferent. That is why some sixes give less than 30 per cent. increased power when their weight, and fuel and oil consumption are 50 per cent. greater than the four of same size, to say nothing of the greater first cost.

### COMFORT—SPEED—COMPLETENESS.

The cushions of the "54" HUDSON are Turkish type—12 inches deep. Backs are high, upholstery thick, springs flexible and the car is so nicely balanced that it will take the worst roads at speed and with little discomfort to passengers.

building. So the "54" HUDSON—Mr. Coffin's answer—is the composite of what the most successful builders, working together, have accomplished.

### THE BEST CAR THEY KNOW.

It is smooth and flexible—the qualities for which sixes are really built, and which inexperienced men seem unable to obtain in the sixes they build.

It is powerful—speedy, beautiful, safe and comfortable. Simplicity is a notable feature, and economy in operation is accomplished as it is in but a few cars.

### NOT JUST TWO CYLINDERS ADDED TO A "FOUR"

Adding two cylinders to a good four won't even make a poor six. Fours and sixes are entirely dif-

ferent. The price for either 5-passenger Touring Car and Torpedo or 2-passenger Roadster is \$2450; 7-passenger Touring Car, \$2600; Coupe, \$2550; Limousine, \$3750—F. O. B. Detroit.

Every detail of motor car comfort is included in the "54."

It is electrically self-cranking, has electric lights, speedometer, clock, top, rain vision windshield, nickel-plated trimmings—21 coats paint and varnish body finish, demountable rims—36x4½ tires, gasoline tank with magnetic gauge on rear, robe rails, curtains and all the appointments that go with the highest type of car.

Representatives of the Balkan League, including Greece, met in London and established entire unity of purpose and action. The purpose in connection with the negotiations about to be entered into with the dove of peace are getting more and more ruffled at London. Russia was Mrs. Marie Van Rensimer and Austria are evading all important questions. The allies' demands are too great. Turkey will concede too little. The Novoe Vremya, the great Jewish-baiting organ of Russia, published at St. Petersburg, has been convicted of grafting and publishing false news to benefit stock speculators.
